

# CITY OF FERNIE LEISURE SERVICES MASTER PLAN

LEISURE SERVICES MASTER PLAN

The Master Plan included a review and recommended improvements of existing recreation facilities, parks and trails, as well as future development of recreational facilities, parks, open spaces and trails. It also included recommendations to enrich indoor recreation programming, a review of the Leisure Services Regulation and Fees bylaw, identification of key grant programs to maximize potential opportunities for funding and recommended approaches to administration and partnerships.

The preparation of the Master Plan involved the participation of hundreds of residents, stakeholder and staff interviews, a council workshop, open houses, online questionnaires and many hours of collaboration with Staff. Geographic data was used to assess the distribution and connectivity of the parks and to assemble an inventory of each recreation and park facility.
