HOWE SOUND COMMUNITY PLAYING FIELD

School District No. 48 (Howe Sound) secured LEES+Associates to develop a new sand-based community playing field at Howe Sound Secondary School. Our team oversaw the concept development, preparation of construction drawings and specifications, and contract administration. The new playing field is a significant addition to the range of recreation and community event opportunities in Squamish. The project was completed in November 2008, and opened to the community in June 2009.
