

Town of Ladysmith, BC (2011)

LADYSMITH COMMUNITY FIELD PROJECT

LEES+Associates was commissioned to prepare design development and construction drawings for a community playing field site for the Town of Ladysmith. The scope of work included a synthetic-turf playing surface, a washroom/change room facility, parking, and a children's play area. The multi-purpose field now serves soccer and related user groups in the community and meets the needs of a number of youth and adult sports organizations. Project construction was completed in March 2011.
