

RIVER VALLEY TRAILS MASTER PLAN

LEES+Associates were engaged by the Town of Devon to prepare a Trails Master Plan for River Valley in Alberta.

The Master Plan included:

- a trail routing plan for the valley slopes;
- a trail signage program;
- an assessment of the trails and recommendations for erosion controls, and
- guidance for the maintenance and future development of the multi-use trail system.

The Master Plan was designed to support current and anticipated future multi-use of the trail system. Construction techniques and re-rerouting requirements considered goals of minimizing impacts to the area's ecosystems, producing negligible soil loss and requiring minimal long term maintenance.

TRAILS MASTER PLAN
